

**Much more than
just spring water!**

***Practical and cost-effective
spring water solutions!***

***The ideal
deferrization unit for:***

- amateur farmers***
- private households***
- other small-scale
water consumers***

REMON
water treatment

Choose expertise and reliability!

Your own spring water is worth its weight in gold!

Remon water treatment is a dynamic business employing expert staff. That is why Remon is the right choice for the installation and maintenance of your spring water facilities.

Spring water is more cost-effective for you than mains water, both right now and in the future. When combined with a deferrization unit, you guarantee yourself crystal-clear water for years.

In addition to the walk-in model, Remon water treatment also offers durable Remotector® deferrization units for professional applications. Please ask for our special brochure, without obligation, by calling:

+31 (0)594 64 80 80

Remon is your partner for:

- well drilling
- deferrization, degassing and pressurization equipment
- reverse osmosis equipment
- water-softening systems and nitrate filters
- irrigation equipment, hoses and sprinklers

In other words: are you looking for a supplier who

- can drill the perfect well for you?
- provides maintenance for your spring water system with the utmost thoroughness?

Then call Remon water treatment!
