

**Pure spring water  
means money saved**

**REMON Water Treatment**

**REMON**  
water treatment

Allow us to introduce to you the Remotector 2000® deferrization unit – a state-of-the-art spring water appliance that not only supplies the very purest water, but also provides considerable savings on your energy bills. Combined with the unique pumps that Remon water treatment employs in de Remotector 2000®, you can guarantee yourself crystal-clear spring water for years.

### Ingenious deferrization

Just like mains water, spring water pumped from the ground needs to have substances removed from it that have a negative effect on its quality, such as iron compounds and manganese. Purified spring water keeps water pipes and nipple drinkers as good as new and, moreover, makes a positive contribution to the health of your livestock.

Remotector 2000®  
International patent number 1005789 DM/047098

### Economical...

The Remotector 2000® is fitted at the factory with a patented energy-saving system. This system is responsible for our unit using up to 50% less energy in practice than traditional deferrization units.

### ...and environmentally friendly

Furthermore, the Remotector 2000® even signals when the purifying filter bed is full and needs flushing out. This saves many litres of flushing water every day compared with other water treatment facilities. In other words, the Remotector 2000 is both economical and environmentally friendly.

Specification		REM 75
Capacity* (pressure free)	m <sup>3</sup> /h	3-7
Pressure at min. capacity	Bar	5
Pressure at max. capacity	Bar	3
Well pump (capacity)	kW	1,5
Pressure-increasing pump	kW	1,7
Voltage	Volt	3 x 380
Requires floor area	m	1,5 x 1,2
Height of installation	m	2
Automatic control	-	PLC
Compressor	-	optional
Alarm	-	optional
Pneumatic control	-	yes

\* different capacities can be supplied

### Advantages of Remotector 2000®

- ▶ savings on water consumption
- ▶ yields a profit at 1000 m<sup>3</sup> per annum
- ▶ economical and environmentally friendly
- ▶ no bothersome condensation owing to double-walled, insulated tank
- ▶ part-payment possible
- ▶ our own service centre (24 hours a day, 7 days a week!)
- ▶ excellent warranty conditions
